

The health and safety of our guests are a top priority at FireWorks Restaurant. As part of our commitment to you, we provide the most current allergen information available from our food suppliers on eight common allergens plus gluten, sesame and added monosodium glutamate (MSG), so that our guests with food allergies can make informed food selections. Unless substitutions and modifications are noted, allergens are calculated based on standard preparation as indicated in the menu. Please be aware that normal kitchen operations involve shared cooking and preparation areas, including common fryer oil, the possibility exists for food items to come in contact with other food products. Due to these circumstances, we are unable to guarantee that any menu item can be completely free of allergens. Please notify us of allergies when ordering.

While we strive to keep this information current, please note that ingredient changes and substitutions may occur. Due to the individualized nature of allergies and food sensitivities, FireWorks Restaurant cannot make recommendations that are suitable for your individual dietary needs. Please consult your physician.
